The Delft Method; *De tweede ronde*

[Meer informatie](#) (from publisher, in het Nederlands)

In this course you will use the Delft Method, a proven method.

! The texts in the Delft Method ***De tweede ronde*** form the core of the lessons. You need to learn these -short- texts by heart. This provides the necessary base for making the exercises and will quickly result in the ability to talk a nice amount of Dutch.

The method is suitable for students who learn through repetition and wish to have their learning process only slightly supported by grammar. It is my experience that many people find it pleasant and relaxing to work with this method. The method takes you by the hand.

During the meetings we will discuss any problem with your preparations.

But above all, we shall talk a lot. Your teacher will practice with you by letting you talk about subjects based on the text. In addition, you will also practice with each other, using the ***oefenboek*** which provides you with a lot of appropriate talking issues. The oefenboek is required.

Group size

Group size: minimum 8, maximum 10 students.
