#### The Delft Method; *Nederlands voor buitenlanders*

In this course you will use the Delft Method, a proven method.

**!** The texts in the Delft Method *Nederlands voor buitenlanders* form the core of the lessons. You need to learn these -short- texts by heart. This provides the necessary base for making the exercises and will quickly result in the ability to talk a nice amount of Dutch.

The method is suitable for students who learn through repetition and wish to have their learning process only slightly supported by grammar. It is my experience that many people find it pleasant and relaxing to work with this method.

During the meetings we will discuss any problem with your preparations.

But above all, you will practice a lot talking about subjects based on the text. In addition, you will also practice with each other, using the *oefenboek* which provides you with a lot of appropriate talking issues.

#### Group size

Group size: minimum 8, maximum 10 students.
